

UFER-VERTEX-1

Roof Mounted Explosion Relief Panel Cassette

THE STRENGTH TO PROTECT

UFER- VERTEX-1 PANELS

Roof mounted, ultrafast explosion relief panel system suitable for use across a wide range of deflagration hazards associated with flammable gases, hydrogen, dusts and hybrid mixtures.

Tested to:

- DnV full-scale explosion tested and ATEX certification pending.
- Conforms to the requirements of ISO 19880-1 & designed in accordance with NFPA 68.

Features:

- Unique design mitigates the need for physical relief fasteners which guarantees reliability and operational performance.
- No mechanical hinges present allowing the panels to operate without producing fragments or missiles.
- Quick and easy on-site installation due to cassette design.
- Burglar bars installed as standard to provide optimum security.

Optional extras:

- Insulation.
- Trace heating for cold environments.

Key Parameters:

- Pstat down to 20 mbarg.
- Low inertia, rapid activation.

Performance envelope:

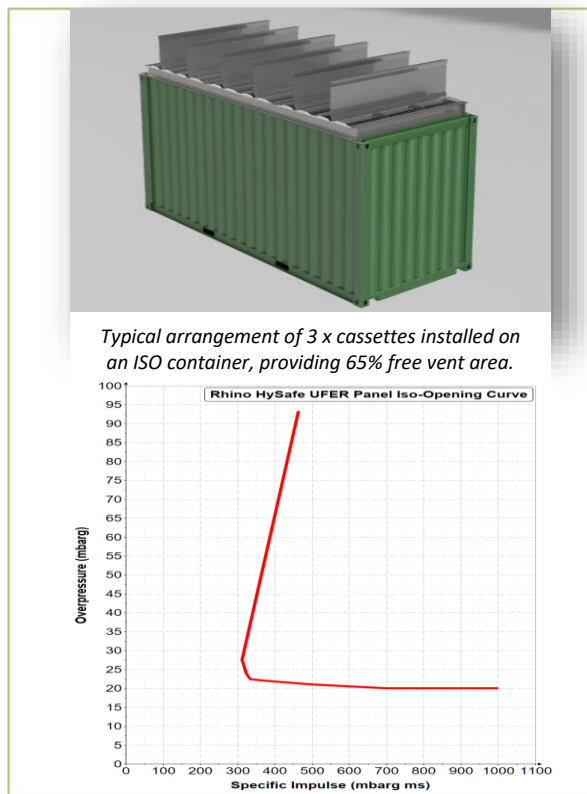

- Please see chart on right.

Cassette Dimensions:

- 1.87m (w) x 2.43m (l)

Clear vent area:

- 2.97m²
